

One-day workshop: Getting started with teaching

Goal: Apply a seven-step recipe to prepare your own lessons.

This workshop is a survival training for your first lesson. As a new academic teacher, you probably have a lot of questions. In the workshop you learn to use a seven-step procedure that helps you to:

- Start with lesson planning.
- Create more interesting seminars.
- Deal with problematic situations many beginners face confidently.

During the workshop, you will create an example plan for a lesson from your field of science.

time	topic
