

## ***One-day workshop: Lecture for excellence***

### **Goal: Plan, Perform, and Prove excellence in your lecture.**

Doing a good lecture is difficult. Simply preparing a good deck of slides doesn't help, because that would take the audience out of the equation. Instead, you can focus on these three components of a successful lecture:

1. **Plan** didactically well-structured units, each with specific learning goals.
2. **Perform** interactive exercises during your lecture such as Multiple Choice Questions.
3. **Prove** that your students learned what you wanted them.

In this workshop, you apply all three strategies to a topic of your choice. Afterwards, you will have an unmistakeably clear structure, recipes for spicing up your stage performance, and a procedure to further improve the yourself and your students' knowledge.

time	topic
9:00	<b>Towards excellence in lectures</b> Introduction & expectations.
9:30	<b>Plan</b> Setting specific learning goals. Structuring your content.
10:30	<b>Perform</b> Interactive exercises. Making lectures more fun.
12:15	<i>Lunch break</i>
13:00	<b>Prove</b> Verifying learning success. Collecting feedback from your audience.
14:30	<b>Showtime!</b> Feedback on your stage performance.
16:30	<b>Summary &amp; feedback</b>
